📄 SUMMARY

IT undergraduate at ITUM with hands-on experience in Computer Vision, Deep Learning, and Full-Stack development. Skilled in building end-to-end edge AI pipelines and scalable web platforms; seeking an ML or Software Engineering Internship.

🧠 FREELANCE & CREATIVE WORK

• Vocal Artistry & Voiceover Production (Narrations, Media Reviews) • Technical Presentation & Communication

🌐 LANGUAGES

English

Sinhala

🎓 EDUCATION

NDT in Information Technology

Institute of Technology, University of Moratuwa (ITUM)

Expected:2027

📜 CERTIFICATES

- AI/ML Engineer - Stage 1 – SLIIT (2026)
- Applied Data Science with Python – Simplilearn (2026)
- Python for Beginners – CODL, University of Moratuwa (2024)
- Front-End Web Development – CODL, University of Moratuwa
- Getting Started with German 1 – The Open University (2026)

📁 PROJECTS

VigilDrive AI – Edge Vision & Flutter Driver Safety Ecosystem

Technologies: Python, OpenCV, MediaPipe, ATmega32, Embedded C, Proteus, Flutter

- Built a two-wheeler safety circuit in Proteus using ATmega32 to detect head-tilt fatigue and crash impacts via ADC sensors with hardware SOS interrupts.
- Implemented computer vision algorithms via MediaPipe Face Mesh to monitor eye-closure (EAR) and head pose (solvePnP) for cabin drivers
- Linked embedded sensor telemetry and real-time vision alerts directly to a Flutter monitoring dashboard.

AI-Powered Anonymous Crisis Intervention & Evidence Platform

Technologies: JavaScript, React, Node.js, Web Security

- Created an encrypted platform for anonymous reporting and evidence preservation for cyberbullying victims
- Ensured secure data integrity and user confidentiality

AI-Powered Career Guidance & Skill-Gap Platform

Technologies: Python NLP, React, Node.js, REST APIs

- Developed an NLP platform evaluating profiles across 7+ industries to detect skill gap
- Generated automated, dynamic learning roadmaps based on semantic analysis

Zero Waste – Smart Surplus Food Redistribution Platform (FYP)

Technologies: React, Spring Boot, MySQL, MongoDB, Docker

- Designed enterprise microservices to redistribute surplus food and reduce waste
- Engineered real-time donor-receiver matching logic and automated reporting systems
